Measured Observations

Item	Location	Measurement	Comments
AMBIENT TEMPERATURE OF REFRIGERATOR	GLASS DOOR COUNTERTOP REFRIGERATOR	43.00 Fahrenheit	43 - 45F, IR THERMOMETER

Overall Comments:

This was a follow-up to the 6/23/25 routine inspection. The major violations were observed to be in compliance as follows:

- 1) The paper towels and soap were stocked in both the men's and women's restrooms.*
- 2) No temperature violations were observed (no foods were stored inside the countertop glass door refrigerator).*
- 3) No evidence of cockroaches was observed.*

The yellow placard was replaced with a green placard. OK to operate.

Note: PIC provided pest control report dated 7/7/25 stating no activity was found. PIC stated facility will continue to receive monthly pest control services.

PIC stated that bags of ice were placed inside the glass door refrigerator to help reduce the ambient temperature. Continue to closely monitor the food temperatures to ensure they stay at 41F and below; an ice bath would be another option.

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **7/29/2025**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
