**The following was discussed with the operator:**

**Ware washing - Manual warewashing shall be accomplished by using a three-compartment sink where the utensils are first precleaned, washed with hot soapy water, rinsed with hot water, sanitized with an approved method, and air dried. Use 1 TBS of bleach (5.25%) per 1 gal. of water for chlorine solution (100 PPM). Use 1 tbs of quaternary ammonium (10%) per 2 gal. of water for quaternary ammonium (200 PPM).**

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **7/2/2026**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
