Overall Comments:

This was a follow-up to the 7/8/25 routine inspection.

PIC provided plumbing service receipt and stated they serviced the facility at 6pm last night.

During today's inspection, the 3-compartment sink was filled with water then allowed to drain while the nearby handsink was running for a few minutes. No sewage backup was observed.

Observed holding temperature violations for foods in the large right prep unit. PIC stated they had called a technician who stated that they are missing a part for the broken fan.

*****Until the unit is repaired and able to keep foods at 41F and below, do not store foods inside this unit. Ice baths may be used in the prep inserts on top to maintain food temperatures, or TPHC with time-marking may be utilized.**

Due to observation of only one major violation, facility received a green placard. OK to operate.

Report will be emailed to facility.
