Overall Comments:

This is the second follow up inspection after the facility was closed for an active cockroach infestation during a complaint investigation. Permitholder provided a completed and signed checklist for reopening, a pest control report from Polaris Pest Control confirming no activity at the facility, and proof of corrections of structural repairs via photographs prior to this inspection.

Observations:

No live cockroaches observed. No dead cockroaches observed. Gaps have been sealed with sealant/foam. Affected areas have been cleaned of cockroach carcasses.

Areas have been cleaned of rodent droppings. No evidence of rodents observed in the facility.

Observed remnants of cockroach droppings in hinges of two chest freezers and in the junction between the wall partition and the wood plank that runs along it.

Facility is okay to open. Submit photographs of the cockroach droppings having been cleaned to EH inspector via email within 1 week. Failure to submit proof of corrections will result in an additional follow up inspection and subject to inspection fees.

FACILITY RE-OPENED / PERMIT REINSTATED

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **10/20/2026**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
