Overall Comments:

This is a follow up inspection to verify that all major violations mentioned on 10/13/25 inspection report have been addressed. Major violations have been addressed and found within compliance:

- K06: Adequate hand wash facilities supplied, accessible. All hand wash stations are fully stocked and operational at the time of inspection. Keep only hand wash station accessible at all times.

- K23: No rodents, insects, birds, or animals. No evidence of vermin activity at the time of inspection. Continue to monitor for vermin activity and contact pest control if anymore issues arise. Recommend having pest control go to facility two times within the month for the next 3-months. Then revert back to once a month if no evidence of vermin is seen. Most current pest control reports were provided to specialist for review.

- Floor, walls, ceilings: built, maintained, clean. All gaps have been sealed properly around the FRP. Food debris around the kitchen has been clean/sanitized properly. Large hole next to the grease trap has been sealed properly.

Continue on working on all other violations mentioned on 10/13/25 inspection report.

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **10/30/2025**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
