Measured Observations

<u>Item</u>	<u>Location</u>	<u>Measurement</u>	<u>Comments</u>
Water	Three Compartment Sink	160.00 Fahrenheit	

Overall Comments:

This is the first follow up inspection following the routine inspection where the facility was closed for an active sewage back up.

Observations:

K22: The waste drain pipe and faucet were replaced at the three compartment sink and is now functioning properly. No back up was observed.

K23: No evidence of cockroaches observed.

K45: The dripping from the ceiling in the kitchen has ceased. The dripping in the dining room appears to be more severe. Per Adeel the property owner is waiting until the rain is over to do repairs. Adeel stated they will finish the walls in the kitchen area with FRP.

K48: Adeel commented that they will submit to our plan check unit in about a month as they look for a new tandor oven. Stated they will need to look into cost of adding an additional hood for a solid fuel oven.

Facility is okay to reopen. Continue to correct any and all pending violations.

FACILITY RE-OPENED / PERMIT REINSTATED

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **3/4/2026**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
