### Overall Comments:

**Note: The high temp dish machine did not reach proper rinse cycle temp the first run. Be sure to run it before using it for dishes until it can reach proper rinse temperature. According to manufacturer the temp must reach at least 180 degrees for sanitizing during the rinse cycle.**

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **3/4/2025**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
