Overall Comments:

Note: Food safety manager certificate:

2. The facility has a two compartment warewash sink which is being used for washing dishes. It is highly recommended replacing the two compartment warewash sink into a three compartment sink for easy washing, rinsing, and sanitizing of equipment/utensils. Modifying existing plumbing system may only be done with plan submission to our office and to the city's building department.

3. Quaternary ammonia sanitizer may be used in a place of bleach to sanitize utensils and for sanitizer buckets.

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **6/4/2025**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
