N/A

Overall Comments:

This was a follow-up to the 6/9/25 and 6/18/25 inspections to assess compliance for vermin evidence/activity.

Facility had completed and submitted the Checklist for Reopening after Closure due to Vermin Infestation a second time today, 6/19/25. Ecolab report provided from this morning around 7am stated no pest activity was found.

Specialist inspected warehouse and kitchen; no evidence of rodents/droppings/cockroaches were observed in the facility.

Observed facility had installed a large piece of plywood against the swing doors separating the warehouse from the kitchen. The swing doors were also lowered so that they were flush to the ground.

Continue to work closely with pest control to monitor vermin activity. Operators stated Ecolab will continue to service the facility weekly for a month, then assess from there and continue working with Ecolab.

Facility was re-opened. Consulted supervisor S. Lew.

FACILITY RE-OPENED / PERMIT REINSTATED

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **7/3/2025**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
