Overall Comments:

Note:1. Food safety manager certificate: Cassandra Peters - 6/21/2030

2. The facility has the following structural deficiencies:

2.1 There is a two compartment warewash sink which is being used for washing dishes. It is highly recommended replacing the two compartment warewash sink into a three compartment sink for easy washing, rinsing, and sanitizing of equipment/utensils

2.2 There is no handwash station in the front service counter area. Please install one behind the counter for employees to wash hand whenever it is necessary

2.3 The facility has a donut fryer and two mini gas stoves back in the kitchen area. None of these are located below an exhaust hood. Please remove these equipment.

2.4 The floor back in the kitchen area is made of wood. It might have to be replaced with restaurant grade floor material.

Please note that modifying existing plumbing, mechanical, electrical, and structural systems may only be done with approved plans submitted to our office and to the city's building department.

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **3/17/2026**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
