**Overall Comments:**

**Note: 1. This is a follow-up inspection to the limited inspection which was conducted on 4/24/2025. The store was closed due to the presence of dead rodent beneath the muffins aisle in aisle 3. Abundant rat droppings were also observed on some aisles over the stored. During today's follow-up inspection, no live or dead rodent was observed. The base covers for most of the aisles were removed and the floor area is cleaned. However, trash and rodent droppings were observed in some aisles which were overlooked by the store manager. The store is made to remove the base covers of the aisles which have not removed the parts and clean the floor area.**

**The store is open for service now. However, the manager is told to conduct another through cleaning on the floor areas, top of the some of the storage shelved and fridges, improve the storage condition back in the receiving area, and seal some of the holes found on the wall in the receiving area. Another follow-up shall be conducted on Monday by a district inspector. Suzanne Lew, Supervising Registered Environmental Health Specialist is consulted about the situation.**
