Overall Comments:

Note: 1. Food safety manager certificate: Maria Castillo - 01/08/2031

2. The school receives it prepackaged food products from the school district's warehouse. Any hot-held potentially hazardous foods not used by the end of the shift is discarded.

3. The cafeteria has a single two compartment warewash sink which is used for washing of dishes, vegetables, and handwashing. It is highly recommended installing a designated three compartment warewash sink for washing utensils, a preparation sink to wash vegetables and fruits, and a handwash station.

3. According to USDA regulation, schools serving lunch through the School Lunch program must have a written HACCP plan in place. Please keep a copy in the cafeteria.

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **10/8/2026**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
