Overall Comments:

Note: 1. Food safety manager certificate: Juanita Chacon Ochoa - 12/11/2026

2. The kitchen does not have a three compartment warewash, a preparation sink, and a designated handwash station in the kitchen area. To prevent possible contamination, and for proper hygiene, it's highly recommended installing a three compartment warewash sink, a preparation sink that drains into a floor sink, and a designated handwash station in the kitchen area. Until these facilities are installed, employees must wash hand in the two compartment warewash sink that is used for washing of utensil, food preparation, and handwashing. Washing and other food preparation in the existing two compartment warewash sink may only be conducted using a strainer/ colanders to prevent possible contamination from back up of sewage.

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **11/4/2025**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
